Office Action Summary

Application No.

10/624,234

Applicant(s)

RITLAND, STEPHEN

Examiner

David Comstock

Art Unit

3733

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 September 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 and 26-29 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 and 26-29 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 July 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Priority

Applicant's removal from the present application of the claim for the benefit of prior-filed provisional application 60/397,191 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 10, 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Caesar (US Pat 2825329).

In regards to claims 1-3, 10, 12-15, Caesar discloses having a device (mounting base) with a securing mechanism (means for securing) (158), a body (150), a first and second aperture (156, one on each side of the body), projection (means for stabilizing) (152) located at the bottom of the body, which is noted to be a pin.

It is acknowledged that functional language is as important as the structural limitations. However, while features of an apparatus may be recited either structurally or functionally, claims directed to an apparatus must be distinguished from the prior art in terms of structure rather than function. (See MPEP 2114). If the functional language is silent in the prior art, then the examiner will determine if the prior art can inherently

Art Unit: 3733

perform the claimed function. To establish inherency, extrinsic evidence must be presented. In this case, the extrinsic evidence is the structural similarity to the disclosed invention (*In re Schreiber*, 128 F.3d.1473, 44 USPQ2d 1429 (Fed Cir 1997)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-9 and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Caesar (US Pat 2825329).

Caesar discloses the claimed invention except for having apertures located on all sides of the body. It is noted that Caesar discloses having apertures on the top and bottom surfaces, and not on the side. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have apertures located on all sides of the body, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Claims 11, 20 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Caesar (US Pat 2825329) in view of Maruyama et al. (US Pat 5487741).

Art Unit: 3733

Caesar discloses the claimed invention except for having flanges in the apertures. Flanges are commonly used to provide extra strength in holding objects.

Maruyama disclose having apertures with flanges (23a, 25a).

It would have been obvious to one skilled in the art at the time the invention was made to construct the invention of Caesar, including flanges in view of Maruyama in order to provide greater strength of holding between the screw and body.

Response to Arguments

Applicant's arguments filed 20 September 2006 have been fully considered but are not persuasive.

In response to Applicant's argument that Caesar does not disclose every feature of the claimed invention, it is noted that a "securing mechanism" is not necessarily a single screw; two screws can also be characterized as the securing mechanism. Furthermore, that securing mechanism (i.e. plural screws) is inserted through the apertures as claimed.

The rejections under 35 USC 103(a) are not deficient because they depend from a base reference and rejection that satisfies the claimed limitations as set forth in the rejection above and in the foregoing paragraph. Applicant did not separately argue the merits of the obviousness rejection. It is noted that Applicants' mention of the teachings of Maruyama does not amount to evidence or a reason for the rejection supposedly being deficient.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Comstock whose telephone number is (571) 272-4710. Please leave a detailed voice message if examiner is unavailable. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached at (571) 272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
